DECLARATION

WE/I, [**Your Name**] (**Roll No: [Your roll number**]), hereby declare that, this report entitled **"[Title of the project report]"** submitted to Indian Institute of Information Technology Kottayam towards partial requirement of **Bachelor of Technology** in textbfComputer Science and Engineering with specialization in **Cyber Security** is an original work carried out by me under the supervision of [**Faculty Name**] and has not formed the basis for the award of any degree or diploma, in this or any other institution or university. We/I have sincerely tried to uphold the academic ethics and honesty. Whenever an external information or statement or result is used then, that have been duly acknowledged and cited.

Corollary 1.1.3. *A corollary to the theorem is....*

Remark 1.1.4. Some remark.....

You may have to type many equations inside the text. The equation can be

typed as below.

$$f(x) = \frac{x^2 - 5x + 2}{e^x - 2} = \frac{y^5 - 3}{e^x - 2} \tag{1.1}$$

This can be referred as (1.1) and so on.....

You may have to type a set of equations. For this you may proceed as given below.

$$\begin{aligned} f(x) &= e^{1+2(x-a)} + \dots \\ &= \log(x+a) + \sin(x+y) + \cdots \end{aligned} \tag{1.2}$$

You may have to cite the articles. You may do so as [1] and so on..... Note that you have already created the 'bib.bib' file and included the entry with the above name. Only then you can cite it as above.

Conclusion

3.1 Summary of the Work

In this project, we have presented the design and implementation of [project title/topic]. The main objective of the work was to [state objective]. The system was developed using [tools/technologies], and it successfully achieved the intended goals.

3.2 Limitations

Despite the successful implementation, the project has certain limitations:

- Limitation 1
- Limitation 2
- Limitation 3

3.3 Future Work

The project can be further enhanced in the following ways:

- Integration with advanced technologies such as AI/ML
- Deployment in real-time environments
- Enhancement of security and scalability
